INTERIM TELEHEALTH GUIDANCE FOR NON-PARTICIPATING PROVIDERS

Cigna Behavioral Health

During this time of heightened awareness of the novel Coronavirus, COVID-19, and its recent classification by the World Health Organization (WHO) as a global pandemic, we want to keep you up to date on how Cigna Behavioral Health is working to help support you and your patients with Cigna coverage.

Many behavioral providers have contacted us about delivering telehealth sessions. While we have been reimbursing for telehealth since 2017, we have made some temporary revisions to telehealth requirements to support continuity of care during this unique situation. The following changes are effective March 17, 2020 through May 31, 2020.

Coverage of behavioral telehealth sessions
Behavioral telehealth sessions are available to patients with Cigna coverage and are administered in accordance with their behavioral health benefits. Prior to rendering services, you should verify behavioral health benefits and eligibility for all plan types, including services administered by a third-party administrator, by calling the number on the back of the patient’s ID card. An “S” identifier on the bottom left of the card can help you identify which of your patients have services administered by a third-party administrator.

Expectations for providing telehealth sessions
It is expected that you use a secure platform to deliver services and follow all Health Insurance Portability and Accountability Act (HIPAA) requirements. Best practice standards indicate that providers be licensed in the state(s) where they practice and where their patient is located at the time of service. During this interim period, we understand that special considerations may need to be made, as some individuals may be displaced.

We are aware that state-specific licensing requirements for the delivery of telehealth may be waived and/or loosened during this time. You are required to follow federal and/or state guidance as it evolves for the delivery of telehealth. If you have questions about licensing mandates, please contact the appropriate state licensing board(s).

While telephonic sessions are not typically covered in accordance with our Medical Necessity Criteria, we are making an exception during this interim period. You may provide telephonic sessions to patients who do not have access to technology to participate in telehealth sessions, as appropriate.

Billing guidance
Behavioral providers who meet telehealth requirements (see above) may deliver services via telehealth.

If you are an individual provider or an outpatient clinic, you may use telehealth for outpatient therapy, applied behavior analysis (ABA),* and medication management. While we understand that you may not submit claims for your patients with Cigna coverage, we ask that you consider doing so during this time. Include the following information on your claim form:

- Appropriate Current Procedural Technology® (CPT®) code in Field 24-D for the service(s) provided
- Modifier 95** in Field 24-D to specify telehealth (see sample claim on page 2)
- Place of Service 02 in Field 24-B (see sample claim form on page 2)
For illustrative purposes only.

If you are rendering services as part of a facility (i.e., intensive outpatient program [IOP], partial hospitalization program [PHP], inpatient), expanded use of telehealth to include psychiatric evaluations, group, or family therapy is permitted at this time, in accordance with current legislative telehealth guidance. Use applicable revenue codes and normal billing procedures. Physician services may be billed separately using the 95 modifier (see above) in cases where the facility rate you are billing is not inclusive of psychiatric evaluation charges. Medical Necessity Criteria for the level of care being delivered must continue to be met.
